Technical skills

- Languages:** Java, C#, Python, Kotlin.
- Architecture and logic:** MVVM, Asynchronous logic.
- Data:** Firebase, NoSQL, JSON.
- Tools:** Git/GitHub, Android Studio, VS, IntelliJ, Eclipse, n8n, Docker, Ollama.
- Design:** Figma, Sketch.

Languages

- Spanish:** Native
- English:** Fluent
- German:** Basic

Academic background

Higher Technician in Cross-Platform Application Development

Universidad Europea, Madrid |
2024-2026

Bachelor's Degree in Finance and Accounting

Faculty of Economic and Business Sciences, Cádiz | 2020 - 2022

Higher Technician in Administration and Finance

Fernando III El Santo High School, Priego de Córdoba | 2018 - 2020

Other relevant information

- Mobility:** Willingness to travel
- Permits:** Class B driver's license and own vehicle
- Interests:** Passionate about political geography, travel, and international culture

About me

Software developer with a practical and problem-solving mindset, accustomed to working in international environments under pressure. My experience in Germany and my prior training in administration and finance have given me a strong work discipline and maturity that I apply directly to solving technical problems.

My goal is to join large-scale technology projects where I can apply my learning ability and my focus on building useful, functional software.

Featured projects

PanGeo - Gamified learning system | *Final Degree Project*

Stack: Kotlin, Jetpack Compose, MVVM, Firebase.

-Android mobile application for gamified geography learning through interactive maps. Allows users to learn through direct touch interaction on vector maps (SVG), integrating game modes and an experience and global rankings system.

Technical experience

Intern Developer (Systems Integration) | *SweetCode*

January 2026 - May 2026

- Maintenance and updating of CMS-based platforms.
- Implementation of technical integrations and customization of features through code.
- Resolution of technical issues and optimization of internal workflows.

International experience

Deutsche Post and DHL | *Wertheim am Main, Germany*

International logistics operator | 2023 - 2024

- Adaptability: Integration into multicultural work environments.
- Responsibility: Management of sensitive documentation and optimization of operational processes.
- Process Optimization: Autonomous learning of multiple operational zones and route design to maximize efficiency and reduce times.

Other work experience

Background in Services and Administration Sector

- Customer service and hospitality.
- Administrative and logistics sector. Experience in accounting, invoicing, and operational tasks in production lines and maintenance.
- Primary Sector. Family work in agricultural harvesting and masonry.
